PRODUCT DATA SHEET

PRODUCT NAME: Two-Pieces PET Induction Liner

Product Description:

Two-pieces PET induction liner is applied for PET bottles (or jars) sealing by induction heating sealer. It has true-weld sealing feature sealing. The sealing layer with aluminum foil is laminated together, and bonded with wax to backing paper. During sealing process, aluminum foil heats the sealing layer and laminating wax, the wax melted and absorbed by backing paper, and that causes the liner separated into 2 parts. So it is called Two-pieces liner.

Application:

Typically for food, beverage, sauce, pharmacy and daily chemical products, for example dry fruit, bean sauce, cosmetic cream, and so on.

Composition:

Data		Figure
Layer	Thickness	
Paper backing	0.5~0.93mm	
Wax	-	
AL (aluminum foil)	0.02mm	
Sealing Layer	0.015mm	
Overall	0.5~1.0mm	

Product Value:

Odor: None detected	GTR: Near Zero
Taste: None detected	MVTR: Near Zero

Regulatory Compliance:

The PET induction liners comply with applicable Chinese Food Industry certificates regulations, for most food, beverage and pharmaceutical products.

Storage and Handling:

Transportation or storage temperature should not exceed 40°C. Avoid exposing to direct sunlight. For best results, wait 48 hours at recommended storage conditions before processing. Do not exceed 12 months of storage from manufacturing date. Recommended sealing temperature is around 140~200°C.
