

PRODUCT DATA SHEET

PRODUCT NAME: Pressure Sensitive Liner

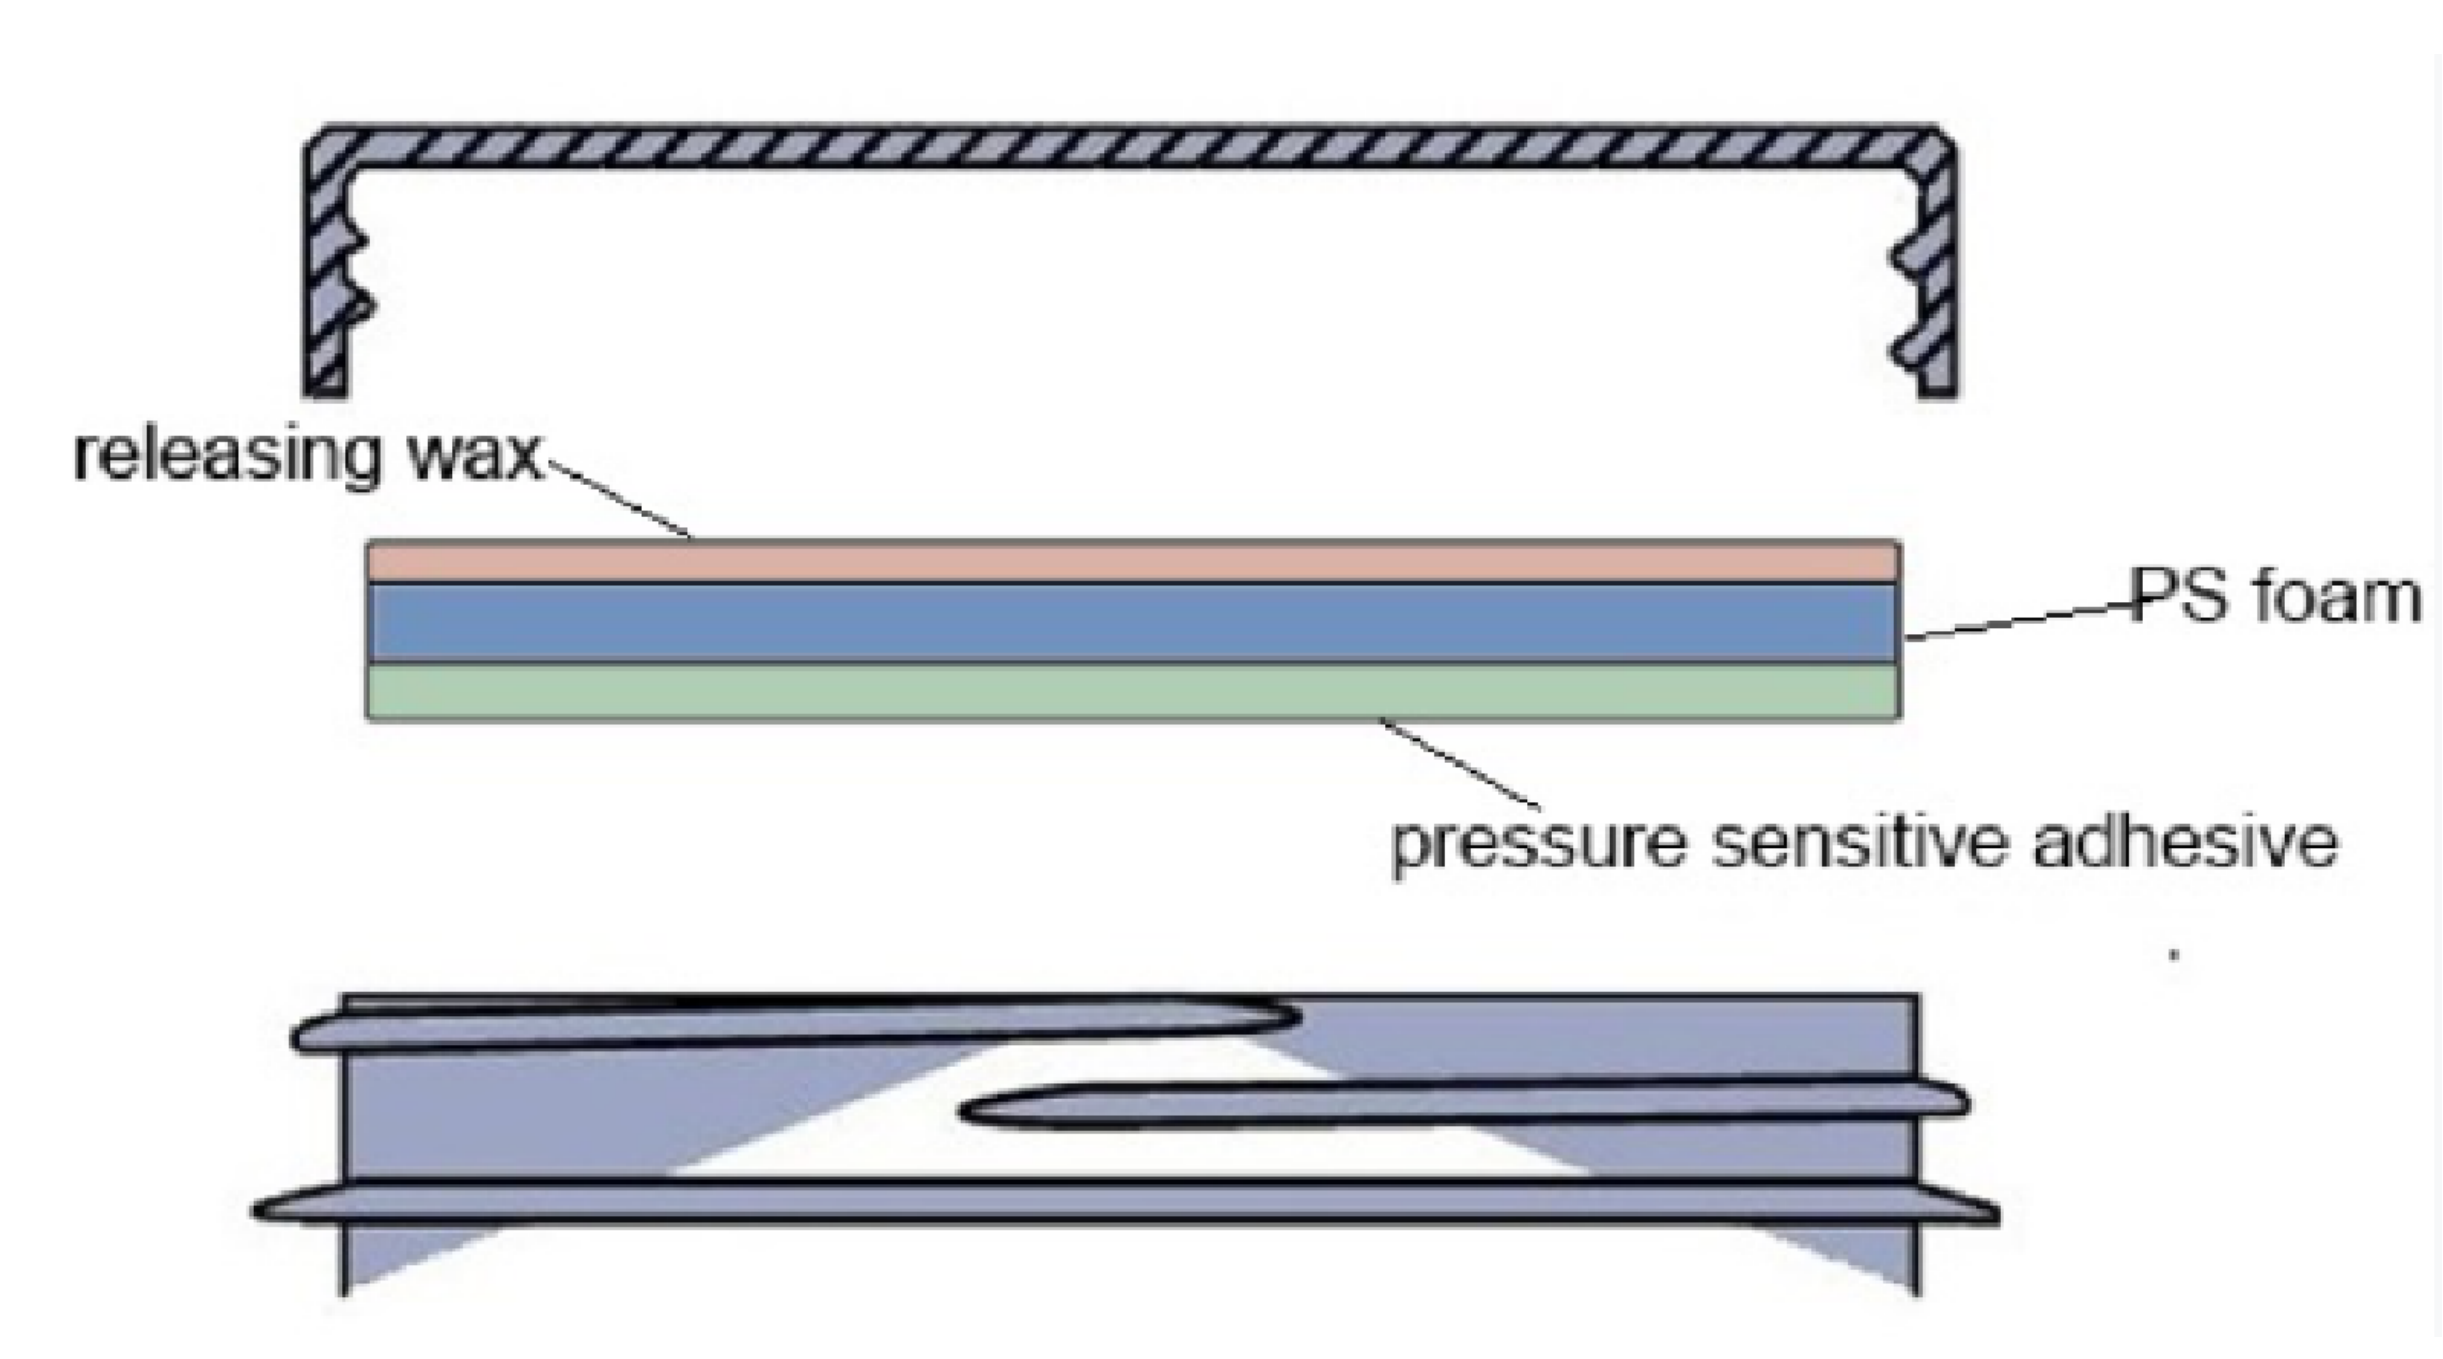

Product Description:

Pressure sensitive liner can be used for all kind of materials (plastic, glass and metal) bottle/jar sealing. It's coating pressure sensitive glue on sealing side, with the force from the cap while close it tightly, the glue will stick on the rim of bottle neck.

Application:

Typically for dry food, pharmacy and daily chemical products, for example dry fruit, spice, cosmetic cream, and so on.

Composition:

Data		Figure
Layer	Thickness	
Releasing wax	-	
PS foam	0.8~2.0mm	
Pressure sensitive glue	0.03~0.06mm	
Overall	0.8~2.0mm	

Product Value:

Odor: None detected	GTR: Near Zero
Taste: None detected	MVTR: Near Zero

Regulatory Compliance:

The pressure sensitive liners comply with applicable Chinese Food Industry certificates regulations, for most food, spice and pharmaceutical products.

Storage and Handling:

Transportation or storage temperature should not exceed 40°C. Avoid exposing to direct sunlight. For best results, wait 48 hours at recommended storage conditions before processing. Do not exceed 12 months of storage from manufacturing date.
